FOREWORD

While last year. was considered by many, as a season of depression our business grew far beyond our expectations. As a result of this growth, we are adding a few new items to our Annual. While compiling this list we have, perhaps, left out some good varieties but have tried to secure only the seeds that would give the best results in this Northwest. In undertaking this we have given preference to Northwestern Grown Seeds, which in our minds are superior to those grown elsewhere. Why spend our money in Europe when our own farmers can grow seeds that are stronger in vitality and higher in the percentage of germination than those grown in any other part of the world. We grow most of our own seeds.

In eliminating expensive "cuts" and excessive and exaggerated descriptions, makes it possible for us to offer the prices that appear here; this and volume in business, are the only things that will enable us to keep the prices down and lower them as we expect to do.

All Seed and Plants are delivered to your door postpaid, at the price quoted, except where noted. The exceptions will apply to Grass Seeds, Grains and Potatoes. Ten pounds of Field Corn postpaid; for larger amounts write us for prices and delivery.

Accompany all orders with Money Order, Express Order, Bank Draft or Checks.

There are many causes that keep seeds from coming up. This may be due to covering too deep, or not deep enough; too much or not enough moisture in the soil or weather too cold or the ground baked by the hot sun. Under these conditions we can give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds or plants sent out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must be returned at once.
